The blade was designed following Andrew Demko's extensive testing and experimentation as a Journeyman Electrician and Engineer. When making his own multi-purpose hand-made work knives he made his own Karambit / Hawkbill hybrid blade that could cut rope, cable, wire and anything else his vocation threw in his path. This knife served him well through years of hard use, and, when tasked by Cold Steel to develop his own take on a folding Karambit, this blade shape immediately came to mind.
