Cold Steel Finn Hawk knife is a design collaboration between Andrew Demko and Lynn C. Thompson, the Cold Steel Finn Hawk is the latest in our series of inexpensive hard wearing bushcraft and outdoor tools. Its traditional Nordic styled "Scandi Ground" German 4116 steel blade is sub-zero cryo-quenched for superior edge holding potential, with a steep 7.5mm blade bevel and a functional curving belly for skinning and slicing strokes. Furthermore, its 4" blade is more than big enough for most game processing tasks, not to mention for camp chores and food prep too. The Finn Hawk's handle is two time injection molded. The first layer of high-impact polypropylene is strong, durable and highly weather resistant, while the outer layer (made of TPR rubber) has a whorled spiral pattern providing a food safe, comfortable and secure grip in even the worst conditions. The Finn Hawk is supplied complete with a slim line secure-ex polymer sheath with integrated belt loop.
