When the U.S. Navy needed a rescue knife they came directly to us. The SARK knife was designed specifically for emergency use situations where safety and effectiveness are equally important. This is an official issue rescue knife to the elite U.S. Navy Rescue Teams. It was designed according to their parameters, field tested in actual emergency conditions, and chosen just as you see it here. Built with a safety tip, curved blade, and Dragon's Teeth™ serrations, it is bulldog strong, razor sharp, and also features the patented "wave shaped feature" for lightening fast opening. This knife is the first hard-use knife ever built for EMT, Paramedic and Rescue use. It is what these professionals needed and they chose Emerson to design and build it. It is an essential tool for anyone who travels off the beaten path. The SARK features our Patented "wave shaped opening feature" or Remote Pocket Opener. In an emergency or injury situation the knife can be opened with one hand as it is drawn from the pocket. Black-T coated partially serrated 154CM premium steel wharncliff style blade with radial thumb lug and wave design thumb ramp. Blunt tip blade. Black G-10 composite laminate handles with lanyard hole. Stainless pocket clip.

Product parameters:

- Total length: 21 cm
- Blade length: 9 cm
- Blade thickness: 3 mm
- Hardness: 57-59 RC
