S1 The Forest Knife is probably the best hunting and fishing knife ever made. Its sturdy blade made of the new extremely strong stainless laminate VG10 custom steel is convex ground for extra strong cutting power with no risk for edge breakage. The modified clip point design works well for penetrating purposes, the long curved edge is ideal for skinning. The blade is long enough for lighter chopping and won't break, it's full 5 mm (0.2") thick!

The checkered handle gives a good grip even when your hands are cold or wet. Depending on your needs, you have the possibility to choose from two kinds of sheaths, an open-top dangler in thick, black leather or a zytel sheath with snappers around the handle. The full tang goes entirely through the handle, so you can strike the end of it without breaking the grip.

Like all our models, the S1 Forest Knife is well tested before release, you will find no teething problems. If you're looking for total quality, a classic knife from Fallkniven AB, is never wrong. Try the S1 Forest Knife, you won't be disappointed!
