The game just changed! The Escape bivvy combines breathability, body heat reflectivity, and water resistance for the most fully-featured backcountry emergency shelter in the SOL line.

The SOL Escape Bivvy is nothing less than a revolution in backcountry shelters. The complaint with most ultralight emergency shelters is the same: condensation builds up inside as you get warm, leaving your clothes soaking wet. With the Escape Bivvy, condensation is no longer an issue, and you never again have to choose between staying dry and staying warm. The proprietary fabric lets moisture escape at the same time that it keeps rain, snow, and wind on the outside - all while reflecting your body heat back to you. Waterproof seams plus a drawstring hood closure and side zip mean you can seal out the elements entirely or use the bivvy like a traditional sleeping bag, and the high-visibility orange exterior makes it easy for rescuers to spot you even in areas with high tree cover.

Product parameters:

- Closed length: 18x10x10 cm
- Weight: 241 g
- Dimensions: 78x213 cm
