The SH1213 Table Display, produced by Hanwei, the maker of our top-of-the line Samurai swords, will display either a two-sword or three-sword set to perfection. The support rails, lined for protection of the sword's finish, carry the Katana and Wakizashi, while a padded shelf is built to display a tanto but adds to the appearance of the display even when unused. A maintenance kit also displays well on this shelf.
