[See it in our store.](#)

Our Practical Single-Hand sword is tailored to the needs of the re-enactor and very affordable. Featuring authentic hilt styling, with fully tempered un-edged and un-pointed blades, these swords are made to withstand rugged use while providing the level of safety required by many of today's re-enactment societies. It features a classically simple hilt, with a permanently-mounted grip and riveted tang for safety. The blade is fullered for balance and features 1/16" edges and a rounded tip. The scabbard is fabricated in a glass-filled resin, to provide great impact resistance, to eliminate swelling and to minimise blade corrosion problems.

Made for the re-enactor
Authentic look and feel
Complies with safety requirements
