The Great Sword of War is designed and crafted purely as a cutting sword and, weighing a little less than four pounds, it is built to excel on heavy targets. The 28 cm grip provides excellent leverage and static and dynamic balance are to Tinker's demanding standards. The blade is again forged in 5160 spring steel and marquenched to HRC 50-52 hardness. The hilt is retained by Tinker's signature recessed sleeve mounting system, providing secure retention and easy hilt tightening using the Allen wrench.

Product parameters:
