The Tinker Norman sword pair, with their distinctive cruciform guard and brazil-nut pommel, are similar in weight and static balance and offer virtually identical handling characteristics. Both are harmonically balanced, optimizing the handling characteristics for the re-enactor in the case of this blunt version. The blade is forged in 5160 high carbon steel and marquenched to HRC 50-52, providing anti-burr safety. The grip is wood-cored and leather-covered over a cord wrap. See product no. SH2426 for the sharp version of the Tinker Norman Sword.
