Leatherman Crunch

Locking pliers that fold away make Crunch unlike any multi-tool available today. It's like carrying a vise with you. Clamps up to a 1" diameter pipe. Remove the adjusting screw and you'll find a 1/4" hex-bit adapter built right in. Locking blades release with the push of a button.

Crunch is a new kind of Leatherman made for the most demanding professional or do-it-yourselfer. It is the only folding tool on the market that offers locking pliers. All interior blades lock as well. Each opens individually, locks positively in place, and is unlocked by a push-button mechanism.

Crunch is full of surprises, like jaws that open to clamp on 1" diameter pipe and a 1/4" hex bit adapter built right into the end of one handle. And it all comes in a tool that folds down to same length as Leatherman's original PST.
