We've had many requests from bush pilots for an outdoor, rugged version of their favorite blade for clearing brush, the wakizashi. This well balanced chopper is up to the task. Tested in-house like all our Cobra Steel line it hacked away anything in its path. Hand forged X46Cr13 steel, full profile tang for strength. Factory sharp, includes leather sheath w/ metal throat and tip. Rubber scales and finger guard for comfort and shock absorption.

Product parameters:

- Total length: 69,2 cm
- Blade length: 50,8 cm
- Steel: X46Cr13
- Hardness: 48 HRC
